Abandoned by the devs, and they have also taken down the multiplayer servers.... Great game. Like being in mount and blade but with motion controls. Real fun taking people out. Its the best VR multiplayer game for me. I have no microphone but fun listening to your enemies as you take them out. Highly recommended. Early access for a reason, can't wait to experience it when it has a much bigger community (playing against bots is easy and boring). Valiant was very good and could have become great, pity it no longer exists. Even early stages this game is fantastic. Pretty solid controls, Great immersive experience. The only problem is no one ever plays the multi-player (very surprsising) because that's the entire point of the game :V

Could have been something really cool. Even though It was pretty motion sickness inducing. They shut down the servers in summer 2017. Where are all the players? Nicely looking game even in this early stage! Playing againts AI is boring, hope more players will come!. This game is a ton of fun. There's nothing quite like the rush of the charge, and driving your sword through an opponent's skull.

Recommended!. Grate game. I'm going to injoy watching this game grow to it's full potential. for those of you that get motion sickness play ADR1FT (don't get sick) and come back and play. no more motion sickness for me and thats all games.. I have played alot of early access Vive games in the last few days. This is one of the best hands down. It includes multiplayer which is awesome(although given the current market penetration of these devices, I've never seen more than a couple of people in a game at a time). However, it is fast paced, realistic and fun. It is in the same vein as the Mount and Blade series if that were boiled down to an arcade medieval combat sim. Must buy for those early adopters of the vive.. fun game but need to add more wepone and character class and more soldiers
